TARSHEED GROUP
FOR ESTIDAMA AND RENEWABLE ENERGY

Investing in brilliant minds
is the renewable source of excellence

WHO WE ARE?

TARSHEED GROUP FOR ESTIDAMA AND RENEWABLE ENERGY was established as an operating entity in UAE and neighboring countries to address business opportunities within the field of renewable energy,

organic recycling and waste management, to become one of the key players in the industry. We offer a broad range of services in renewable energy and sustainable solutions consulting and engineering along with wide selection of solar products including PV modules, inverters and many other premium quality solar equipment. Our team are dedicated to designing and presenting creative sustainable and eco-friendly solutions, and fully equipped with the knowledge and expertise in their respective fields of specialization.

WHY UAE?

The UAE's industrial ecosystem is conducive to growth, as industrialists can easily access financial, advisory and technical support to establish and develop their businesses. The country boasts a diverse energy mix at competitive prices. Topping regional and global indices in logistics, transport and communications.

The UAE also ranks high in global indicators that measure economic performance and ease of doing business, in addition to enjoying a strong credit rating. The country's legislative framework is considered the most advanced in the region and its strategic location makes it a global link.

From the UAE, it is possible to reach global markets spanning five billion people through flights that do not exceed eight hours.

OUR VISION:

Enhancing technological advancements reliance in renewable energy sector, as well as focusing on investing in both renewable energy and clean alternative energy solutions, using safe eco-friendly yet reliable technology, in line with Emirates' energy strategy 2050, which aims to increase the contribution of clean and renewable sources in the total energy mix, and support future strategic aspirations

OUR MISSION:

To be a trusted sustainability partner, providing a range of reliable products and services, as well as promoting green practices in addition to establishing and developing new synergies that facilitates the widespread use of renewable energy sources with the ultimate goal of achieving a sustainable future.

OUR BUSINESSES:

INVESTMENT:

Without any doubts, clean renewable energy is a stable investment that can provide an attractive financial return. It is increasingly economical due to the rapid technological advancements in the industry, which is reducing the costs for solar panels, wind turbines, and batteries for energy storage. That's making the sector totally profitable. Tarsheed Group for Estidama and Renewable Energy investment strategy includes building green energy portfolios generate superior returns, and offers a creative investment solutions in which our investors will be protected from increased utility charges in addition to the great environmental benefits, which make this sector a more win-win investment.

OUR BUSINESSES:

CONSULTANCY:

We provide a full analysis of the project to determine the costs, difficulties and outcomes, to evaluate the potential merits of the solution, and objectively assess its value. No matter the size of your project, Tarsheed Group for Estidama and Renewable Energy team are fully equipped with the knowledge and expertise to come up with innovative cost-effective green energy solutions with full packages of professional services that fulfill your requirements.

OUR BUSINESSES:

SOLAR INDUSTRY:

WHY GO SOLAR?

- Renewable: solar panels produce electricity by transforming the continuous flow of energy coming from the sun.
- Clean: no harmful emissions are released into air when electricity is produced by solar panels.
- Saves Money (less maintenance): the photovoltaic process that transforms sunlight into electricity doesn't require any fuel and has no variable costs. Once installed, solar panels require very little maintenance.
- Independent & Efficient: Investing in a solar power system makes you less reliant on the national grid for your electricity since you'll be contributing to a more efficient way of generating energy.
- Get Paid: you could get paid for the energy generated by your solar PV system as net metering allows you to sell back excess energy produced.

We excel in our sustainable
solutions
